

Technology and healthy lives

April 19, 2017

“Key to Health” is the joint project of PAT, APSS, INAIL and FBK that promotes healthy lifestyles in the workplace

Preventing some of the most widespread critical issues, such as cardiovascular diseases, which according to WHO estimates were the cause of death of 68% of all deaths recorded in 2012. This is the aim of the “[Key to Health](#)” project presented in February at Trento-based Fondazione Bruno Kessler and included in the 2015-2018 Prevention Plan of the Provincial Government as a pilot project that could be extended to the entire Province or on a national scale.

Listen to the talks (in Italian) by Francesco Profumo, FBK President, [Francesco Miele](#), FBK researcher with the “[Health and Wellbeing](#)” High Impact Area, **Paolo Bordon**, **APSS** general director, **Luca Zeni**, Councillor for Health at the **Trento Province Government Council** and **Stefania Marconi**, **INAIL** Trento Province Director.
