
FONDAZIONE BRUNO KESSLER (FBK)

CALL FOR THE SELECTION OF THE HEAD OF RESEARCH, STUDY AND INNOVATION IN ONE OF THE FOLLOWING AREAS:

Evaluation of Public Policies (*FBK-IRVAPP*) and Religious Studies (*FBK-ISR*)

1 (Premise)

Confirmed and recognized for the quality of its research in science and technology and for its high economic and social impact, the Fondazione Bruno Kessler www.fbk.eu is renowned for its focus on interdisciplinarity and complexity.

With its 3,500 square meters of laboratories and scientific facilities, and drawing on a community of over 400 stable researchers, 140 PhD students, 200 visiting fellows and/or students writing their dissertations, as well as 700 affiliated and/or accredited students, the Fondazione Bruno Kessler – in close synergy with the University of Trento – acts as a scientific and technological hub, its premises and platforms hosting a lively ecosystem of co-located ventures, spin-offs, projects and training opportunities.

2 (Prerequisites)

In view of the European “recovery and resilience policy” (Next Generation EU), the Fondazione Bruno Kessler is in the process of updating its organizational and operational statute.

The assumptions of this renewal – contained in the 2018-2027 Strategic Plan – rest on scientific excellence and innovation, financial autonomy and sustainability, transparent evaluation systems, and an innovative model of strategic marketing and business development.

3 (Goals)

The goals pursued by the Foundation in updating its organizational and operative model may be summarized as: broadening the horizon of its own research and social responsibility, stepping up integration of its own research and innovation lines and activities, increasing its appeal especially

among young talents, working towards a new generational and gender balance, turning the skills of scientific management towards a "people oriented" managerial spirit.

4 (Aside)

The above premises, prerequisites, and goals constitute the reference framework for the selection of the persons responsible for the following two areas of research, study, and innovation: the Research Institute for the Evaluation of Public Policies (FBK-IRVAPP) and the Center for Religious Studies (FBK-ISR).

The Research Institute for the Evaluation of Public Policies (IRVAPP) is focused on the evaluation of public policies, the dissemination of findings from this research, the promotion of a culture of impact evaluation, the training of policy evaluators, the analysis of socio-economic inequalities, and the development of micro-simulation models for the analysis of fiscal policies and their distributive effects. Research activities focus on labour policies, education policies, industrial policies, welfare policies, and dynamics of socio-economic inequalities.

The Center for Religious Studies (ISR) promotes research in the fields of religious and theological studies with particular attention to the field of "religion and innovation" and other key topics and issues linked to other lines of research pursued at Fondazione Bruno Kessler.

The selection of these figures, will thus complement the unitary design pursued by the Fondazione which only a few months ago chose the heads of structures pertaining to cyber security, digital society, health & wellbeing, digital industry, sustainable energy and who will shortly – also in an interdisciplinary vision – be joined by the new directors of the Italian-German Historical Institute (FBK-ISIG) and the Center for *Sensors and Devices* (FBK-S&D).

5 (Subjective Requirements)

To the extent that they correspond to the Foundation's mission and Strategic Plan and to the extent that they adhere to the aforementioned premises, prerequisites, and goals, applications from those candidates with documented international experience and advanced scientific and/or managerial

qualifications, as well as a proven network of relationships in their communities of reference, will be taken into consideration.

More in detail, for FBK-IRVAPP eligible applicants are professors or researchers in Economics, Sociology, Statistics, affiliated with public or private universities or research institutes of international standing.

While for FBK-ISR eligible applicants are full professors in theology, philosophy, history, law or related disciplines, affiliated with public or private universities or research institutes of international standing.

Previous experience and leadership in international research teams or projects are preferable.

6 (Applications)

Applications for the positions of head of research, study, and innovations of the Foundation respectively for the Research Institute for the Evaluation of Public Policies (FBK-IRVAPP) and the Center for Religious Studies (FBK-ISR) must be sent to <https://jobs.fbk.eu/> by July 30, 2021, at 12.00 (noon, Italian time) in the form of a written proposal in which the above premise, prerequisites, and goals are to be illustrated at three and six years from now, according to the candidate's personal view (at most four pages with 1500 characters each). An updated *Curriculum Vitae* must be attached with the proposal, listing relevant publications and/or other R&D products of any description, the candidates' scientific and managerial experiences, and their relational networks in the relevant community.

Up to the closing date for submissions, candidates may arrange for a personal meeting to get to know the Foundation and its research and study areas with the Secretary General Staff.

7 (Terms of Appointment)

This is preferably a full-time position; however, the Foundation is open to hiring highly-dedicated part-time candidates. This is a three-year appointment and may be renewed once for another three years.

If compatible, the contract will be the one applied by the Foundation, the sole collective *ad hoc* contract for Research & Innovation in the private sector. Alternatively, the collaboration appointment will be consistent with the goals pursued by the Foundation and with its organizational and operational model.

The professional category and basic salary will be those stipulated for senior managerial and scientific staff. Any bonuses and incentive plans will be subject to individual negotiation.

8 (Selection Procedure)

Compliant applications will be considered by an Evaluating Committee appointed by the Foundation's Board of Administration.

The Committee will be composed of 2 experts of proven scientific and/or managerial experience, 1 member of the Autonomous Province of Trento, 1 Board members, 1 member of the Scientific Committee, as well as the President and the Secretary General of the Foundation.

In compliance with the Foundation's gender equality policy, the Evaluation Committee will be equally composed of both genders.

The Committee's assessment will be comprised of separate scores for: 1) the written proposal; 2) the publications and/or products of research and innovation, however denominated; 3) any formerly held scientific and/or management posts; 4) the relationship networks in the scientific communities related to the areas of reference; 5) a final interview (only for short-listed candidates).

In full respect of the data regulation policy, candidates admitted to the final interview will first be offered a personality test/assessment aimed at measuring their professional performance for the role sought.

The presentation of the candidates before the final interview may be followed in streaming by the Foundation's personnel.

The final breakdown of assessment scores and a report on the procedure will be submitted to the Board of Administration who will make the final decision.

Trento, 23 June 2021

THE FBK CHAIRMAN

Please read the “Guidelines for selection of Directors” before completing your application.
